

VIKING ALLOY STEEL

- is the economic blade for a multitude of sawing jobs.

Alloy Steel is a special band steel quality which, in a special thermal treatment has obtained a high resistance and a maximum flexibility.

VIKING HSS BI-METAL

- the totally professional hacksaw blade.

- The High Speed Steel teeth are electronically welded on to a flexible steel back resulting in a blade with all advantages: high hardness of the teeth, yet low risk of breakage in a blade which will cut the hardest materials.
